

**PRODUCT
OVERVIEW**

SGS Dental Swiss Implant System

is based in Zug, Switzerland with aim to offer the customers
a comprehensive range of innovative, science-based dental solutions.

SGS Dental Swiss Implant System is not only a dental product,
but it is about art and experience in clinical practice as well.

Thanks to quality Swiss technology, SGS Dental Swiss Implant System pro-
vides excellent products at competitive prices with strong support. We use the
most precise tools and equipment with the best raw materials, that is why SGS be-
came one of market leaders in the dental implant industry. Our system is used by
thousands of professionals all around the world.

CAD - CAM ACCESSORIES

SGS Dental Dynamic Solutions

Dynamic cad-cam system

It is used in those cases which are necessary to rectify the entry of the screw due to an unfavorable position of the implants, improving the functionality and aesthetics of the milled prosthesis.

Our screwdriver has a contra-angle connection to make it easier to use with a dynamometer or manual ratchet, with the corresponding adaptors or handles.

The system protects the screw, prevents its breakage when applying an excess of torque, causing the deformation of the screwdriver, before this happens.
